LACK OF MELANISM IN *COLIAS*

Photo of *Colias eurytheme* male supplied by John H. Masters of specimen in the collection of Dr. Mance Brackney of Minneapolis, Minn.; collected in Hennepin County, Minn. Dorsal and ventral views are shown. The specimen appears to be normal except for the absence of all black pigmentation. This is the same specimen shown in *J. Lepid Soc.* 22:158, 1968.
